Institution of Chemical Engineers

CD-ROM Included

The principal international conference in the field, presenting the latest research across a wide range of disciplines, from both industrial and academic practitioners. The conference provided a forum for discussion of the latest advances in the theory and practice of crystallization as it relates to the production of bulk crystalline materials.

IChemE, the Institution of Chemical Engineers, is the center for chemical, biochemical and process engineering professionals worldwide.

We are the heart of the process community, promoting competence and a commitment to sustainable development, advancing the discipline for the benefit of society and supporting the professional development of members.

Some of the areas we publish in include:

- Safety in the process industries - the BP Process Safety series
- Consultancy for chemical engineers
- Project management in the process industries
- Contract management in the process industries - International Forms Of Contract series
- Communication skills for engineers
