Geostationary Satellites Collocation Hengnian Li

Geostationary Satellites Collocation aims to find solutions for deploying a safe and reliable collocation control. Focusing on the orbital perturbation analysis, the mathematical foundations for orbit and control of the geostationary satellite. The mathematical and physical principle of orbital maneuver and collocation strategies for multi geostationary satellites sharing with the same dead band is also stressed. Moreover, the book presents some applications using the above algorithms and mathematical models to help readers master the corrective method for planning station keeping maneuvers. Engineers and scientists in the fields of aerospace technology and space science can benefit from this book.

Hengnian Li is the Deputy Director of State Key Laboratory of Astronautic Dynamics, China.

From reader reviews:

Richard Hood:

Hey guys, do you wish to find a new book to study? Maybe the book with the title Geostationary Satellites Collocation suitable to you? The particular book was written by a famous writer in this era. The particular book titled Geostationary Satellites Collocation is one of several books that everyone reads now. This particular book has inspired many people in the world. When you read this e-book you will enter the new way of measuring that you have never known before. The author explained their idea in a simple way, so all of us can easily be aware of the core of this book. This book will give you a wide range of information about this world now. To help you see the representation of the world on this book.

Aimee Simmons:

The actual book Geostationary Satellites Collocation has a lot associated with it. So when you make sure to read this book you can get a lot of profit. The book was published by the very famous author. This author makes some research ahead of writing this book. This book is very easy to read; you can find the point easily after reading this article book.

Joe Lowe:

In this age of globalization it is important for someone to find information. The information will help a professional understand the condition of the world. The fitness of the world makes the information better to share. You can find a lot of sources to get information, for example: internet, classifieds, book, and soon. You can observe that now, a lot of publishers in which print many kinds of books. The particular book that I recommend to you personally is Geostationary Satellites Collocation; this guide consists of a lot of information on the condition of this world now. This particular book was represented so why the world has grown up. The words and styles that the writer uses to explain it are easy to understand. Typically the writer made some research when he wrote this book. Here is why this book is appropriate for all of you.

Dale Moore:

Reading a book makes you get more knowledge from it. You can take knowledge and information coming from a book. A book is written or printed or highlighted from each source; this is filled with updates of news. Within this modern era like today, many ways to get information are available for you actually. From media social just like newspaper, magazines, science e-book, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Do you want to spend your spare time to open your book? Or just in search of the Geostationary Satellites Collocation when you require it?
