L-Functions and Galois Representations (London Mathematical Society Lecture Note Series)

L-Functions and Galois Representations (London Mathematical Society Lecture Note Series)

This collection of survey and research articles brings together topics at the forefront of the theory of L-functions and Galois representations. Highlighting important progress in areas such as the local Langlands programme, automorphic forms and Selmer groups, this timely volume treats some of the most exciting recent developments in the field. Included are survey articles from Khare on Serre's conjecture, Yafaev on the André-Oort conjecture, Emerton on his theory of Jacquet functors, Venjakob on non-commutative Iwasawa theory and Vigneras on mod p representations of $GL(2)$ over p -adic fields. There are also research articles by: Böckle, Buzzard, Cornut and Vatsal, Diamond, Hida, Kurihara and R. Pollack, Kisin, Nekovář, and Bertolini, Darmon and Dasgupta. Presenting the very latest research on L-functions and Galois representations, this volume is indispensable for researchers in algebraic number theory.

From reader reviews:

Carol Reck:

Why don't make it to become your habit? Right now, try to ready your time to do the important behave, like looking for your favorite e-book and reading a book. Beside you can solve your condition; you can add your knowledge by the reserve entitled L-Functions and Galois Representations (London Mathematical Society Lecture Note Series). Try to stumble through book L-Functions and Galois Representations (London Mathematical Society Lecture Note Series) as your close friend. It means that it can to become your friend when you sense alone and beside that course make you smarter than ever. Yeah, it is very fortunated for you personally. The book makes you far more confidence because you can know almost everything by the book. So , let's make new experience and knowledge with this book.

Nathaniel Marvel:

What do you concentrate on book? It is just for students since they're still students or this for all people in the world, the actual best subject for that? Merely you can be answered for that problem above. Every person has distinct personality and hobby for every single other. Don't to be pressured someone or something that they don't desire do that. You must know how great as well as important the book L-Functions and Galois Representations (London Mathematical Society Lecture Note Series). All type of book is it possible to see on many options. You can look for the internet options or other social media.

Linda Manning:

Playing with family in a very park, coming to see the marine world or hanging out with friends is thing that usually you may have done when you have spare time, then why you don't try issue that really opposite from that. A single activity that make you not sensation tired but still relaxing, trilling like on roller coaster you have been ride on and with addition details. Even you love L-Functions and Galois Representations (London Mathematical Society Lecture Note Series), you could enjoy both. It is fine combination right, you still wish to miss it? What kind of hangout type is it? Oh come on its mind hangout folks. What? Still don't buy it, oh come on its called reading friends.

Mary Quinn:

Beside this specific L-Functions and Galois Representations (London Mathematical Society Lecture Note Series) in your phone, it may give you a way to get nearer to the new knowledge or details. The information and the knowledge you will got here is fresh in the oven so don't end up being worry if you feel like an old people live in narrow town. It is good thing to have L-Functions and Galois Representations (London Mathematical Society Lecture Note Series) because this book offers for your requirements readable information. Do you oftentimes have book but you do not get what it's about. Oh come on, that will not end up to happen if you have this in your hand. The Enjoyable option here cannot be questionable, like treasuring beautiful island. So do you still want to miss that? Find this book as well as read it from at this point!
