Illustrated with two hundred color photographs, this striking volume reveals the worlds of four neighboring prides that roam the diverse habitats of Botswana's Okavango Delta. Drawing on continuing field research begun in 1995, Pieter Kat shows how Okavango lions challenge long-held assumptions about sociability, mating strategies, and hunting techniques. Pride males readily mate with females from other prides; females often leave their offspring vulnerable to predators; and lions are more prone to hunting mistakes and scavenging than has been commonly believed.
