Applied Probability (Springer Texts in Statistics) Kenneth Lange

Applied Probability presents a unique blend of theory and applications, with special emphasis on mathematical modeling, computational techniques, and examples from the biological sciences. It can serve as a textbook for graduate students in applied mathematics, biostatistics, computational biology, computer science, physics, and statistics. Readers should have a working knowledge of multivariate calculus, linear algebra, ordinary differential equations, and elementary probability theory.

Chapter 1 reviews elementary probability and provides a brief survey of relevant results from measure theory. Chapter 2 is an extended essay on calculating expectations. Chapter 3 deals with probabilistic applications of convexity, inequalities, and optimization theory. Chapters 4 and 5 touch on combinatorics and combinatorial optimization. Chapters 6 through 11 present core material on stochastic processes. If supplemented with appropriate sections from Chapters 1 and 2, there is sufficient material for a traditional semester-long course in stochastic processes covering the basics of Poisson processes, Markov chains, branching processes, martingales, and diffusion processes. The second edition adds two new chapters on asymptotic and numerical methods and an appendix that separates some of the more delicate mathematical theory from the steady flow of examples in the main text.

Besides the two new chapters, the second edition includes a more extensive list of exercises, many additions to the exposition of combinatorics, new material on rates of convergence to equilibrium in reversible Markov chains, a discussion of basic reproduction numbers in population modeling, and better coverage of Brownian motion. Because many chapters are nearly self-contained, mathematical scientists from a variety of backgrounds will find *Applied Probability* useful as a reference

From reader reviews:

Justin Perry:

This Applied Probability (Springer Texts in Statistics) book is not ordinary book, you have after that it the world is in your hands. The benefit you get by reading this book is actually information inside this publication incredible fresh, you will get data which is getting deeper you actually read a lot of information you will get. This specific Applied Probability (Springer Texts in Statistics) without we recognize teach the one who examining it become critical in pondering and analyzing. Don't always be worry Applied Probability (Springer Texts in Statistics) can bring when you are and not make your tote space or bookshelves' come to be full because you can have it inside your lovely laptop even phone. This Applied Probability (Springer Texts in Statistics) having excellent arrangement in word and layout, so you will not feel uninterested in reading.

Pedro Dillon:

Playing with family in a very park, coming to see the sea world or hanging out with pals is thing that usually you could have done when you have spare time, in that case why you don't try matter that really opposite from that. A single activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition associated with. Even you love Applied Probability (Springer Texts in Statistics), you could enjoy both. It is excellent combination right, you still desire to miss it? What kind of hangout type is it? Oh can happen its mind hangout folks. What? Still don't get it, oh come on its called reading friends.

Norman Fuentes:

Many people spending their moment by playing outside having friends, fun activity using family or just watching TV the whole day. You can have new activity to enjoy your whole day by reading a book. Ugh, do you consider reading a book can definitely hard because you have to bring the book everywhere? It all right you can have the e-book, having everywhere you want in your Touch screen phone. Like Applied Probability (Springer Texts in Statistics) which is having the e-book version. So , why not try out this book? Let's find.

Nancy Ochoa:

Many people said that they feel bored stiff when they reading a publication. They are directly felt it when they get a half elements of the book. You can choose the actual book Applied Probability (Springer Texts in Statistics) to make your own reading is interesting. Your own skill of reading talent is developing when you including reading. Try to choose very simple book to make you enjoy you just read it and mingle the sensation about book and looking at especially. It is to be initially opinion for you to like to available a book and study it. Beside that the guide Applied Probability (Springer Texts in Statistics) can to be your new friend when you're really feel alone and confuse in what must you're doing of this time.
