Modern Automotive Technology

James E Duffy

Modern Automotive Technology James E Duffy

Modern Automotive Technology details the construction, operation, diagnosis, service, and repair of late-model automobiles and light trucks. This comprehensive text uses a building-block approach that starts with the fundamental principles of system operation and progresses gradually to complex diagnostic and service procedures. Short sentences, concise definitions, and thousands of color illustrations help students learn quickly and easily. The text provides thorough coverage of the latest developments on the automotive field, including OBD II diagnostics, enhanced emissions testing, misfire monitoring, air bag systems, anti-lock brakes, and security systems. Organized around the eight ASE automobile test areas, this text is a valuable resource for students preparing for a career in automotive technology, as well as experienced technicians who are preparing for the ASE Certification/Rectification Tests.
