Transactions on Data Hiding and Multimedia Security III (Lecture Notes in Computer Science)

Since the mid 1990s, data hiding has been proposed as an enabling technology for securing multimedia communication, and is now used in various applications including broadcast monitoring, movie fingerprinting, steganography, video indexing and retrieval, and image authentication. Data hiding and cryptographic techniques are often combined to complement each other, thus triggering the development of a new research field of multimedia security. Besides, two related disciplines, steganalysis and data forensics, are increasingly attracting researchers and becoming another new research field of multimedia security. This journal, LNCS Transactions on Data Hiding and Multimedia Security, aims to be a forum for all researchers in these emerging fields, publishing both original and archival research results.

This third issue contains five contributions in the areas of steganography and digital watermarking. The first two papers deal with the security of steganographic systems; the third paper presents a novel image steganographic scheme. Finally, this volume includes two papers that focus on digital watermarking and data hiding. The fourth paper introduces and analyzes a new covert channel and the fifth contribution analyzes the performance of additive attacks against quantization-based data hiding methods.

From reader reviews:

Charles Tapia:

Why don't make it to be your habit? Right now, try to prepare your time to do the important take action, like looking for your favorite book and reading a reserve. Beside you can solve your condition; you can add your knowledge by the e-book entitled Transactions on Data Hiding and Multimedia Security III (Lecture Notes in Computer Science). Try to make the book Transactions on Data Hiding and Multimedia Security III (Lecture Notes in Computer Science) as your friend. It means that it can to become your friend when you sense alone and beside that course make you smarter than in the past. Yeah, it is very fortunated for you. The book makes you more confidence because you can know every thing by the book. So , let us make new experience and knowledge with this book.

Graciela Johnson:

The guide with title Transactions on Data Hiding and Multimedia Security III (Lecture Notes in Computer Science) has a lot of information that you can learn it. You can get a lot of advantage after read this book. That book exist new knowledge the information that exist in this book represented the condition of the world now. That is important to yo7u to know how the improvement of the world. This book will bring you inside new era of the the positive effect. You can read the e-book with your smart phone, so you can read that anywhere you want.

Virginia Mack:

You can spend your free time to study this book this e-book. This Transactions on Data Hiding and Multimedia Security III (Lecture Notes in Computer Science) is simple to create you can read it in the area, in the beach, train along with soon. If you did not possess much space to bring the particular printed book, you can buy the e-book. It is make you much easier to read it. You can save often the book in your smart phone. Thus there are a lot of benefits that you will get when you buy this book.

Donald Perkins:

Beside this particular Transactions on Data Hiding and Multimedia Security III (Lecture Notes in Computer Science) in your phone, it may give you a way to get more close to the new knowledge or facts. The information and the knowledge you might got here is fresh from the oven so don't always be worry if you feel like an old people live in narrow town. It is good thing to have Transactions on Data Hiding and Multimedia Security III (Lecture Notes in Computer Science) because this book offers to you readable information. Do you oftentimes have book but you would not get what it's interesting features of. Oh come on, that would not happen if you have this in your hand. The Enjoyable option here cannot be questionable, such as treasuring beautiful island. So do you still want to miss the idea? Find this book and also read it from currently!
