With a new Introduction and Table of Contents by Steve Sheppard, Enfield Distinguished Professor of Law, University of Arkansas School of Law. Originally published: London: William How, 1588. xxxvii (iii-xxvii new introduction), [xiv], [151] leaves (364 pp.). Written in 1588, The Lawiers Logike is the first legal treatise to apply the tools of logic to legal argument. This was a controversial and new concept at the time because its thesis contrasts with common law and its unmethodical and disorganized approach to law. Its influence is still felt. It is a unique work in which Fraunce castigates lazy lawyers and mixes illustrations from poetry and prose with often quite technical illustrations from law treatises and case reports. In his introduction, Steve Sheppard points out that this work informs three fields of American law the study of legal analysis and argument, the intersection of law with other disciplines, and the moral justification of law itself. (Introduction, iii).
