Markus Lohrey

The Compressed Word Problem for Groups (SpringerBriefs in Mathematics) Markus Lohrey

The Compressed Word Problem for Groups provides a detailed exposition of known results on the compressed word problem, emphasizing efficient algorithms for the compressed word problem in various groups. The author presents the necessary background along with the most recent results on the compressed word problem to create a cohesive self-contained book accessible to computer scientists as well as mathematicians. Readers will quickly reach the frontier of current research which makes the book especially appealing for students looking for a currently active research topic at the intersection of group theory and computer science. The word problem introduced in 1910 by Max Dehn is one of the most important decision problems in group theory. For many groups, highly efficient algorithms for the word problem exist. In recent years, a new technique based on data compression for providing more efficient algorithms for word problems, has been developed, by representing long words over group generators in a compressed form using a straight-line program. Algorithmic techniques used for manipulating compressed words has shown that the compressed word problem can be solved in polynomial time for a large class of groups such as free groups, graph groups and nilpotent groups. These results have important implications for algorithmic questions related to automorphism groups.

From reader reviews:

Scott Hagen:

The book *The Compressed Word Problem for Groups (SpringerBriefs in Mathematics)* can give more knowledge and information about everything you want. So why must we leave a very important thing like a book *The Compressed Word Problem for Groups (SpringerBriefs in Mathematics)*? Wide variety you have a different opinion about e-book. But one aim that will book can give many info for us. It is absolutely right. Right now, try to closer with your book. Knowledge or details that you take for that, you can give for each other; you can share all of these. Book *The Compressed Word Problem for Groups (SpringerBriefs in Mathematics)* has simple shape but you know: it has great and big function for you. You can seem the enormous world by open up and read a book. So it is very wonderful.

Donald Diaz:

Do you among people who can't read pleasurable if the sentence chained inside straightway, hold on guys this aren't like that. This *The Compressed Word Problem for Groups (SpringerBriefs in Mathematics)* book is readable through you who hate the perfect word style. You will find the facts here are arrange for enjoyable studying experience without leaving possibly decrease the knowledge that want to supply to you. The writer connected with *The Compressed Word Problem for Groups (SpringerBriefs in Mathematics)* content conveys the idea easily to understand by many individuals. The printed and e-book are not different in the articles but it just different available as it. So , do you even now thinking *The Compressed Word Problem for Groups (SpringerBriefs in Mathematics)* is not loveable to be your top collection reading book?

Rebecca Muldoon:

People live in this new day of lifestyle always try and and must have the time or they will get great deal of stress from both way of life and work. So , once we ask do people have free time, we will say absolutely indeed. People is human not really a robot. Then we inquire again, what kind of activity are there when the spare time coming to a person of course your answer can unlimited right. Then do you ever try this one, reading publications. It can be your alternative in spending your spare time, the book you have read is usually *The Compressed Word Problem for Groups (SpringerBriefs in Mathematics)*.

Floyd Brown:

As we know that book is very important thing to add our understanding for everything. By a publication we can know everything we really wish for. A book is a set of written, printed, illustrated or even blank sheet. Every year ended up being exactly added. This book *The Compressed Word Problem for Groups (SpringerBriefs in Mathematics)* was filled concerning science. Spend your free time to add your knowledge about your research competence. Some people has distinct feel when they reading any book. If you know how big benefit of a book, you can feel enjoy to read a reserve. In the modern era like currently, many ways to get book that you wanted.
