MPLS and VPN Architectures (Paperback) (Networking Technology) Ivan Pepelnjak, Jim Guichard

A practical guide to understanding, designing, and deploying MPLS and MPLS-enabled VPNs

- In-depth analysis of the Multiprotocol Label Switching (MPLS) architecture
- Detailed discussion of the mechanisms and features that constitute the architecture
- Learn how MPLS scales to support tens of thousands of VPNs
- Extensive case studies guide you through the design and deployment of real-world MPLS/VPN networks
- Configuration examples and guidelines assist in configuring MPLS on Cisco® devices
- Design and implementation options help you build various VPN topologies

Multiprotocol Label Switching (MPLS) is an innovative technique for high-performance packet forwarding. There are many uses for this new technology, both within a service-provider environment and within the enterprise network, and the most widely deployed usage today is the enabling of Virtual Private Networks (VPNs). With the introduction of MPLS-enabled VPNs, network designers are able to better scale their networks than with the methods available in the past.

Network engineers and administrators need quick, effective education on this technology to efficiently deploy MPLS-enabled VPNs within their networks. With that goal in mind, *MPLS and VPN Architectures* provides an in-depth discussion particular to Cisco's MPLS architecture. This book covers MPLS theory and configuration, network design issues, and case studies as well as one major MPLS application: MPLS-based VPNs. The MPLS/VPN architecture and all its mechanisms are explained with configuration examples, suggested design and deployment guidelines, and extensive case studies.

MPLS and VPN Architectures is your practical guide to understanding, designing, and deploying MPLS and MPLS-based VPNs.

From reader reviews:

Kevin Gans:

Information is provisions for those to get better life, information today can get by anyone in everywhere. The information can be a expertise or any news even an issue. What people must be consider while those information which is inside the former life are hard to be find than now's taking seriously which one works to believe or which one the actual resource are convinced. If you have the unstable resource then you understand it as your main information there will be huge disadvantage for you. All those possibilities will not happen in you if you take MPLS and VPN Architectures (Paperback) (Networking Technology) as your daily resource information.

Adela Valenti:

Reading a guide tends to be new life style in this particular era globalization. With reading you can get a lot of information that can give you benefit in your life. Using book everyone in this world can certainly share their idea. Publications can also inspire a lot of people. A great deal of author can inspire all their reader with their story or their experience. Not only the storyline that share in the ebooks. But also they write about advantage about something that you need instance. How to get the good score toefl, or how to teach your children, there are many kinds of book that you can get now. The authors on earth always try to improve their talent in writing, they also doing some exploration before they write on their book. One of them is this MPLS and VPN Architectures (Paperback) (Networking Technology).

Edna Vachon:

MPLS and VPN Architectures (Paperback) (Networking Technology) can be one of your beginning books that are good idea. All of us recommend that straight away because this e-book has good vocabulary that may increase your knowledge in language, easy to understand, bit entertaining but nonetheless delivering the information. The article writer giving his/her effort to put every word into satisfaction arrangement in writing MPLS and VPN Architectures (Paperback) (Networking Technology) although doesn't forget the main position, giving the reader the hottest and based confirm resource information that maybe you can be considered one of it. This great information can draw you into brand-new stage of crucial thinking.

Robert Rascoe:

Are you kind of hectic person, only have 10 or 15 minute in your morning to upgrading your mind ability or thinking skill actually analytical thinking? Then you are receiving problem with the book when compared with can satisfy your small amount of time to read it because this all time you only find publication that need more time to be study. MPLS and VPN Architectures (Paperback) (Networking Technology) can be your answer as it can be read by an individual who have those short extra time problems.
