Modeling and Analysis of Human Error in Naval Aviation Maintenance Mishaps Ashley D. Fry

This is a NAVAL POSTGRADUATE SCHOOL MONTEREY CA DEPT OF OPERATIONS RESEARCH report procured by the Pentagon and made available for public release. It has been reproduced in the best form available to the Pentagon. It is not spiral-bound, but rather assembled with Velobinding in a soft, white linen cover. The Storming Media report number is A662183. The abstract provided by the Pentagon follows: This study investigates human error associated with 599 Naval Aviation maintenance-related mishaps (MRMs) in Fiscal Years 90-99. The Human Factors Analysis and Classification System Maintenance Extension (HFACS-ME) taxonomy was utilized to classify contributory human errors within a robust theoretical framework. Variable Poisson process models are developed to predict MRMs and relationships between the error dimensions are investigated. The results of this study show that the HFACS-ME taxonomy provides an adequate framework for the classification of MRM causal factors; that variable Poisson process models are suitable for predicting future mishaps, and that there are significant relationships between selected causal dimensions; sufficient to warrant further investigation. These results provide information regarding the predicted impact of MRMs on future operational readiness and mission capability. Through being aware of these aspects, decision-makers are armed with the knowledge to make better decisions concerning the preservation and allocation of the resources at their disposal.

From reader reviews:

Alan Coleman:

What do you with regards to book? It is not important along? Or just adding material when you need something to explain what the one you have problem? How about your extra time? Or are you busy individual? If you don't have spare time to try and do others business, it is give you a sense of feeling bored faster. And you have free time? What did you do? Everyone has many questions above. They should answer that question simply because just their can do that. It said that about book. Book is familiar in each person. Yes, it is right. Because start from on kindergarten until university need this Modeling and Analysis of Human Error in Naval Aviation Maintenance Mishaps to read.

Armando Lemaire:

A lot of people always spent their particular free time to vacation or perhaps go to the outside with them loved ones or their friend. Did you know? Many a lot of people spent they will free time just watching TV, or perhaps playing video games all day long. If you want to try to find a new activity that's look different you can read any book. It is really fun for you personally. If you enjoy the book that you read you can spent the entire day to reading a reserve. The book Modeling and Analysis of Human Error in Naval Aviation Maintenance Mishaps it is quite good to read. There are a lot of individuals who recommended this book. These folks were enjoying reading this book. In the event you did not have enough space to develop this book you can buy often the e-book. You can m0ore easily to read this book from the smart phone. The price is not very costly but this book provides high quality.

Florence Nguyen:

Modeling and Analysis of Human Error in Naval Aviation Maintenance Mishaps can be one of your basic books that are good idea. We all recommend that straight away because this reserve has good vocabulary that could increase your knowledge in vocab, easy to understand, bit entertaining but nonetheless delivering the information. The author giving his/her effort to set every word into enjoyment arrangement in writing Modeling and Analysis of Human Error in Naval Aviation Maintenance Mishaps but doesn't forget the main stage, giving the reader the hottest and based confirm resource facts that maybe you can be considered one of it. This great information can drawn you into new stage of crucial pondering.

Billie Gallagher:

Beside this particular Modeling and Analysis of Human Error in Naval Aviation Maintenance Mishaps in your phone, it might give you a way to get nearer to the new knowledge or facts. The information and the knowledge you may got here is fresh through the oven so don't end up being worry if you feel like an outdated people live in narrow commune. It is good thing to have Modeling and Analysis of Human Error in Naval Aviation Maintenance Mishaps because this book offers to you readable information. Do you sometimes have book but you would not get what it's about. Oh come on, that would not happen if you have

this inside your hand. The Enjoyable set up here cannot be questionable, like treasuring beautiful island. Use you still want to miss that? Find this book and also read it from now!
