Laszlo Fuchs

Modules over Non-Noetherian Domains (Mathematical Surveys and Monographs) Laszlo Fuchs

In this book, the authors present both traditional and modern discoveries in the subject area, concentrating on advanced aspects of the topic. Existing material is studied in detail, including finitely generated modules, projective and injective modules, and the theory of torsion and torsion-free modules. Some topics are treated from a new point of view. Also included are areas not found in current texts, for example, pure-injectivity, divisible modules, uniserial modules, etc. Special emphasis is given to results that are valid over arbitrary domains. The authors concentrate on modules over valuation and Prufer domains, but also discuss Krull and Matlis domains, \mathfrak{h} -local, reflexive, and coherent domains. The volume can serve as a standard reference book for specialists working in the area and also is a suitable text for advanced-graduate algebra courses and seminars.

From reader reviews:

Steven Resnick:

Why don't make it to become your habit? Right now, try to ready your time to do the important action, like looking for your favorite publication and reading a guide. Beside you can solve your problem; you can add your knowledge by the reserve entitled Modules over Non-Noetherian Domains (Mathematical Surveys and Monographs). Try to make book Modules over Non-Noetherian Domains (Mathematical Surveys and Monographs) as your good friend. It means that it can to be your friend when you feel alone and beside regarding course make you smarter than previously. Yeah, it is very fortunated in your case. The book makes you much more confidence because you can know almost everything by the book. So , we need to make new experience along with knowledge with this book.

Daniele Vaugh:

Are you kind of stressful person, only have 10 as well as 15 minute in your day to upgrading your mind ability or thinking skill also analytical thinking? Then you are experiencing problem with the book as compared to can satisfy your short space of time to read it because pretty much everything time you only find publication that need more time to be go through. Modules over Non-Noetherian Domains (Mathematical Surveys and Monographs) can be your answer since it can be read by you actually who have those short free time problems.

Sherry Ellis:

Beside that Modules over Non-Noetherian Domains (Mathematical Surveys and Monographs) in your phone, it may give you a way to get nearer to the new knowledge or details. The information and the knowledge you can got here is fresh through the oven so don't end up being worry if you feel like an outdated people live in narrow town. It is good thing to have Modules over Non-Noetherian Domains (Mathematical Surveys and Monographs) because this book offers to your account readable information. Do you oftentimes have book but you would not get what it's about. Oh come on, that will not happen if you have this within your hand. The Enjoyable set up here cannot be questionable, similar to treasuring beautiful island. So do you still want to miss this? Find this book in addition to read it from right now!

Ryan Parker:

Don't be worry should you be afraid that this book can filled the space in your house, you could have it in e-book way, more simple and reachable. This particular Modules over Non-Noetherian Domains (Mathematical Surveys and Monographs) can give you a lot of good friends because by you considering this one book you have factor that they don't and make anyone more like an interesting person. This particular book can be one of a step for you to get success. This reserve offer you information that might be your friend doesn't learn, by knowing more than additional make you to be great persons. So , why hesitate? Let me have Modules over Non-Noetherian Domains (Mathematical Surveys and Monographs).
