Vital for a game of cricket or golf and enjoyable when picnicking in the park, turfgrass provides a wide range of aesthetic and recreational benefits. However, managed turfgrass is prone to damaging outbreaks of insects and mites. *Pest Management of Turfgrass for Sport and Recreation* is the first comprehensive work on the plant-eating insects and mites of the grass and non-grass species currently maintained as ornamental lawns and turfgrass playing surfaces throughout Australia, the South Pacific and South-East Asia.

This book provides an industry reference for the identification of pests affecting the roots, stems and leaves of turfgrass and control of these species through integrated pest management. It contains information on the distribution, ecology and biology of pests and how to monitor them. The integrated pest management approach outlined in the book includes natural environmental controls, beneficial and predatory species of arthropods, resistant cultivars and insecticidal and miticidal pesticides.

*Pest Management of Turfgrass for Sport and Recreation* is an essential manual for managers of sportsgrounds, bowling greens, lawn tennis courts, golf courses, racecourses, ornamental landscapes, amenity parklands, public reserves and turfgrass production farms.
