GOLDEN NON-EUCLIDEAN GEOMETRY, THE: HILBERT'S FOURTH PROBLEM, "GOLDEN" DYNAMICAL SYSTEMS, AND THE FINE-STRUCTURE CONSTANT (Series on Analysis, Applications and Computation)

Alexey Stakhov, Samuil Aranson, Scott Olsen

GOLDEN NON-EUCLIDEAN GEOMETRY, THE: HILBERT'S FOURTH PROBLEM, "GOLDEN" DYNAMICAL SYSTEMS, AND THE FINE-STRUCTURE CONSTANT (Series on Analysis, Applications and Computation)

Alexey Stakhov, Samuil Aranson, Scott Olsen

GOLDEN NON-EUCLIDEAN GEOMETRY, THE: HILBERT'S FOURTH PROBLEM, "GOLDEN" DYNAMICAL SYSTEMS, AND THE FINE-STRUCTURE CONSTANT (Series on Analysis, Applications and Computation) Alexey Stakhov, Samuil Aranson, Scott Olsen

This unique book overturns our ideas about non-Euclidean geometry and the fine-structure constant, and attempts to solve long-standing mathematical problems. It describes a general theory of "recursive" hyperbolic functions based on the "Mathematics of Harmony," and the "golden," "silver," and other "metallic" proportions. Then, these theories are used to derive an original solution to Hilbert's Fourth Problem for hyperbolic and spherical geometries. On this journey, the book describes the "golden" qualitative theory of dynamical systems based on "metallic" proportions. Finally, it presents a solution to a Millennium Problem by developing the Fibonacci special theory of relativity as an original physical-mathematical solution for the fine-structure constant. It is intended for a wide audience who are interested in the history of mathematics, non-Euclidean geometry, Hilbert's mathematical problems, dynamical systems, and Millennium Problems.

Contents:

- The Golden Ratio, Fibonacci Numbers, and the "Golden" Hyperbolic Fibonacci and Lucas Functions
- The Mathematics of Harmony and General Theory of Recursive Hyperbolic Functions
- Hyperbolic and Spherical Solutions of Hilbert's Fourth Problem: The Way to the Recursive Non-Euclidean Geometries
- Introduction to the "Golden" Qualitative Theory of Dynamical Systems Based on the Mathematics of Harmony
- The Basic Stages of the Mathematical Solution to the Fine-Structure Constant Problem as a Physical Millennium Problem
- Appendix: From the "Golden" Geometry to the Multiverse

Readership: Advanced undergraduate and graduate students in mathematics and theoretical physics, mathematicians and scientists of different specializations interested in history of mathematics and new mathematical ideas.

From reader reviews:

Robert Grant:

The book GOLDEN NON-EUCLIDEAN GEOMETRY, THE: HILBERT'S FOURTH PROBLEM, "GOLDEN" DYNAMICAL SYSTEMS, AND THE FINE-STRUCTURE CONSTANT (Series on Analysis, Applications and Computation) give you a sense of feeling enjoy for your spare time. You can utilize to make your capable more increase. Book can being your best friend when you getting stress or having big problem together with your subject. If you can make reading a book GOLDEN NON-EUCLIDEAN GEOMETRY, THE: HILBERT'S FOURTH PROBLEM, "GOLDEN" DYNAMICAL SYSTEMS, AND THE FINE-STRUCTURE CONSTANT (Series on Analysis, Applications and Computation) to get your habit, you can get much more advantages, like add your personal capable, increase your knowledge about many or all subjects. You can know everything if you like available and read a reserve GOLDEN NON-EUCLIDEAN GEOMETRY, THE: HILBERT'S FOURTH PROBLEM, "GOLDEN" DYNAMICAL SYSTEMS, AND THE FINE-STRUCTURE CONSTANT (Series on Analysis, Applications and Computation). Kinds of book are a lot of. It means that, science guide or encyclopedia or other folks. So , how do you think about this reserve?

David Barr:

That guide can make you to feel relax. This specific book GOLDEN NON-EUCLIDEAN GEOMETRY, THE: HILBERT'S FOURTH PROBLEM, "GOLDEN" DYNAMICAL SYSTEMS, AND THE FINE-STRUCTURE CONSTANT (Series on Analysis, Applications and Computation) was vibrant and of course has pictures on there. As we know that book GOLDEN NON-EUCLIDEAN GEOMETRY, THE: HILBERT'S FOURTH PROBLEM, "GOLDEN" DYNAMICAL SYSTEMS, AND THE FINE-STRUCTURE CONSTANT (Series on Analysis, Applications and Computation) has many kinds or style. Start from kids until adolescents. For example Naruto or Private eye Conan you can read and think that you are the character on there. Therefore not at all of book are make you bored, any it makes you feel happy, fun and unwind. Try to choose the best book in your case and try to like reading that will.

Jesus Jones:

What is your hobby? Have you heard in which question when you got college students? We believe that that issue was given by teacher on their students. Many kinds of hobby, Every individual has different hobby. Therefore you know that little person like reading or as examining become their hobby. You need to understand that reading is very important in addition to book as to be the thing. Book is important thing to provide you knowledge, except your current teacher or lecturer. You get good news or update in relation to something by book. Different categories of books that can you choose to adopt be your object. One of them is niagra GOLDEN NON-EUCLIDEAN GEOMETRY, THE: HILBERT'S FOURTH PROBLEM, "GOLDEN" DYNAMICAL SYSTEMS, AND THE FINE-STRUCTURE CONSTANT (Series on Analysis, Applications and Computation).

Jennifer Jackson:

Reading a publication make you to get more knowledge from it. You can take knowledge and information coming from a book. Book is composed or printed or created from each source which filled update of news. In this particular modern era like now, many ways to get information are available for anyone. From media social including newspaper, magazines, science e-book, encyclopedia, reference book, book and comic. You can add your knowledge by that book. Do you want to spend your spare time to spread out your book? Or just looking for the GOLDEN NON-EUCLIDEAN GEOMETRY, THE: HILBERT'S FOURTH PROBLEM, "GOLDEN" DYNAMICAL SYSTEMS, AND THE FINE-STRUCTURE CONSTANT (Series on Analysis, Applications and Computation) when you necessary it?
