Making Urban Buildings for Model Railways

David Wright

Making Urban Buildings for Model Railways David Wright

This fascinating book is aimed at all those modellers who wish to create a model railway set in an urban landscape. It covers the selection and the construction of a wide range of urban buildings, and presents many detailed photographs of real buildings from which the modeller can gain ideas, identify specific features and draw inspiration. Special attention is paid to modelling architectural details and to the effects of weathering. Scratch-building techniques and materials, as well as ready-to-plant buildings and kits are covered. In addition to the buildings themselves, the author also considers the urban setting and infrastructure, and demonstrates how to construct roads and pavements, create authentic street scenes, and make realistic models that accurately reflect, for example, urban decay and dereliction. Finally, consideration is given to perspective modelling, a concept that provides the modeller with an opportunity to make much better use of a limited amount of space. Essential reading for all model makers, especially those with a passion for railway modelling. Superbly illustrated with over 300 colour illustrations, including step-by-step photographs.
