## **Design of Building Structures, The** Wolfgang Schueller

Appropriate for courses in building structures, construction, design engineering and structural design in architecture and civil engineering departments. Rather than relying on separate literature in the fields of structural engineering, architecture, construction and history, this text presents the field of structures holistically in terms of building and architecture. Buildings are studied from all points of view: geometrical, aesthetic, historical, functional, environmental and construction--providing the broadest treatment of structures available.
