**Cellular Manufacturing Systems: Design, planning and control** N. Singh, Divakar Rajamani

Batch manufacturing is a dominant manufacturing activity in the world, generating a great deal of industrial output. In the coming years, we are going to witness an era of mass customization of products. The major problems in batch manufacturing are a high level of product variety and small manufacturing lot sizes. The product variations present design engineers with the problem of designing many different parts. The decisions made in the design stage significantly affect manufacturing cost, quality and delivery lead times. The impacts of these product variations in manufacturing are high investment in equipment, high tooling costs, complex scheduling and loading, lengthy setup time and costs, excessive scrap and high quality control costs. However, to compete in a global market, it is essential to improve the productivity in small batch manufacturing industries. For this purpose, some innovative methods are needed to reduce product cost, lead time and enhance product quality to help increase market share and profitability. What is also needed is a higher level of integration of the design and manufacturing activities in a company. Group technology provides such a link between design and manufacturing. The adoption of group technology concepts, which allow for small batch production to gain economic advantages similar to mass production while retaining the flexibility of job shop methods, will help address some of the problems.

### **From reader reviews:**

#### **Christopher Arredondo:**

Have you spare time for any day? What do you do when you have more or little spare time? That's why, you can choose the suitable activity to get spend your time. Any person spent all their spare time to take a move, shopping, or went to the particular Mall. How about open or maybe read a book titled Cellular Manufacturing Systems: Design, planning and control? Maybe it is for being best activity for you. You know beside you can spend your time with your favorite's book, you can smarter than before. Do you agree with its opinion or you have various other opinion?

#### **Douglas Wyss:**

The book Cellular Manufacturing Systems: Design, planning and control can give more knowledge and information about everything you want. So just why must we leave the best thing like a book Cellular Manufacturing Systems: Design, planning and control? Several of you have a different opinion about publication. But one aim that will book can give many data for us. It is absolutely proper. Right now, try to closer with the book. Knowledge or facts that you take for that, you can give for each other; it is possible to share all of these. Book Cellular Manufacturing Systems: Design, planning and control has simple shape however, you know: it has great and large function for you. You can appearance the enormous world by wide open and read a reserve. So it is very wonderful.

#### **Robert Dougherty:**

Reading can called brain hangout, why? Because if you find yourself reading a book specifically book entitled Cellular Manufacturing Systems: Design, planning and control your head will drift away trough every dimension, wandering in most aspect that maybe unfamiliar for but surely might be your mind friends. Imaging just about every word written in a reserve then become one form conclusion and explanation that will maybe you never get prior to. The Cellular Manufacturing Systems: Design, planning and control giving you another experience more than blown away your brain but also giving you useful details for your better life within this era. So now let us demonstrate the relaxing pattern the following is your body and mind are going to be pleased when you are finished reading it, like winning a. Do you want to try this extraordinary paying spare time activity?

#### **Harold Karr:**

This Cellular Manufacturing Systems: Design, planning and control is brand new way for you who has curiosity to look for some information mainly because it relief your hunger info. Getting deeper you into it getting knowledge more you know or you who still having tiny amount of digest in reading this Cellular Manufacturing Systems: Design, planning and control can be the light food in your case because the information inside this kind of book is easy to get by anyone. These books produce itself in the form which is reachable by anyone, yes I mean in the e-book contact form. People who think that in guide form make them

feel tired even dizzy this book is the answer. So there is not any in reading a e-book especially this one. You can find what you are looking for. It should be here for an individual. So , don't miss the item! Just read this e-book kind for your better life and also knowledge.
