Modelling Survival Data in Medical Research (Chapman & Hall/CRC Texts in Statistical Science)

David Collett

Data collected on the time to an event—such as the death of a patient in a medical study—is known as survival data. The methods for analyzing survival data can also be used to analyze data on the time to events such as the recurrence of a disease or relief from symptoms. *Modelling Survival Data in Medical Research* begins with an introduction to survival analysis and a description of four studies in which survival data was obtained. These and other data sets are then used to illustrate the techniques presented in the following chapters, including the Cox and Weibull proportional hazards models; accelerated failure time models; models with time-dependent variables; interval-censored survival data; model checking; and use of statistical packages. Designed for statisticians in the pharmaceutical industry and medical research institutes, and for numerate scientists and clinicians analyzing their own data sets, this book also meets the need for an intermediate text which emphasizes the application of the methodology to survival data arising from medical studies.

From reader reviews:

Shanika Jeans:

In this 21st one hundred year, people become competitive in each and every way. By being competitive today, people have to do something to make themselves survive, being in the middle of the crowded place and notice simply by surrounding. One thing that sometimes many people have underestimated the idea for a while is reading. Yes, by reading a guide your ability to survive increases then having a chance to endure than others is high. For yourself who want to start reading any book, we give you this Modelling Survival Data in Medical Research (Chapman & Hall/CRC Texts in Statistical Science) book as a starter and daily reading book. Why, because this book is more than just a book.

Angela Harris:

This Modelling Survival Data in Medical Research (Chapman & Hall/CRC Texts in Statistical Science) are reliable for you who want to become a successful person, why. The main reason of this Modelling Survival Data in Medical Research (Chapman & Hall/CRC Texts in Statistical Science) can be on the list of great books you must have will be giving you more than just simple reading through food but feed a person with information that might be will shock your prior knowledge. This book will be handy, you can bring it just about everywhere and whenever your conditions in the e-book and printed kinds. Beside that this Modelling Survival Data in Medical Research (Chapman & Hall/CRC Texts in Statistical Science) giving you an enormous of experience for example rich vocabulary, giving you a trial of critical thinking that we all know it useful in your day activity. So, let's have it and luxuriate in reading.

Randall James:

This book titled Modelling Survival Data in Medical Research (Chapman & Hall/CRC Texts in Statistical Science) to be one of several books that best seller in this year, that is because when you read this book you can get a lot of benefit on it. You will easily to buy this particular book in the book retail outlet or you can order it via online. The publisher in this book sells the e-book too. It makes you easier to read this book, because you can read this book in your Cell phone. So there is no reason for you to pass this e-book from your list.

William Evans:

As a college student exactly feel bored to reading. If their teacher questioned them to go to the library or even make summary for some reserve, they are complained. Just little students that has reading's heart or real their hobby. They just do what the educator want, like asked to the library. They go to at this time there but nothing reading really. Any students feel that studying is not important, boring and can't see colorful pics on there. Yeah, it is being complicated. Book is very important for yourself. As we know that on this time, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore, this Modelling Survival Data in Medical Research (Chapman & Hall/CRC Texts in Statistical

Science) can make you sense more interested to read.
