Application of Computers and Operations Research in the Mineral Industry: Proceedings of the 37th International Symposium

Application of Computers and Operations Research in the Mineral Industry: Proceedings of the 37th International Symposium

APCOM 2015: Your key to effective decision making and staying current with the rapidly evolving minerals industry.

The symposium series on the Application of Computers and Operations Research in the Mineral Industry (APCOM) was initiated by The University of Arizona in 1961. Since then, APCOM has become an international forum for presentation, discussion, and criticism of the state-of-the-art and emerging technologies in the fields of computer and operations research applications applied to the broad minerals industry.

With 113 peer-reviewed papers from all mineral industry sectors?industry, academia, and government agencies?the 37th APCOM proceedings holds the latest knowledge and the most current best practices to incorporate computer technology into mining operations and mining public relations.

The mining operations topics cover sophisticated new engineering techniques to identify better mineral deposits and extract them more efficiently in a safer, bettermanaged mine using the latest tools in geometallurgy, geostatistics, mine design, production planning, 2D and 3D modeling, simulations, mine automation, rock mechanics, mineral processing, and unconventional energy resources. Mining public relations topics, broadly defined, cover not just publicity and outreach but regulatory compliance?winning over neighbors, environmental activists, and other stakeholders?and designing interfaces and training tools using virtual reality and other cutting-edge applications.

A few of the highlights include how to:

- Apply the lessons of ant colonies to optimize pipeline routes?and lessons from genetic algorithms to dig better with draglines,
- Find the economic optimum depth for jointly operating underground and open pit mines,
- Reduce energy costs by using magnetic-powered hoist systems and other new technologies, and
- Identify (and thus address) dust dispersion problems before they occur.

From reader reviews:

Beverly Dewitt:

Typically the book Application of Computers and Operations Research in the Mineral Industry: Proceedings of the 37th International Symposium will bring you to definitely the new experience of reading the book. The author style to explain the idea is very unique. When you try to find new book to read, this book very appropriate to you. The book Application of Computers and Operations Research in the Mineral Industry: Proceedings of the 37th International Symposium is much recommended to you to see. You can also get the e-book from official web site, so you can more easily to read the book.

Zachary Kirkland:

Are you kind of occupied person, only have 10 or 15 minute in your day time to upgrading your mind ability or thinking skill actually analytical thinking? Then you are having problem with the book in comparison with can satisfy your limited time to read it because this all time you only find e-book that need more time to be study. Application of Computers and Operations Research in the Mineral Industry: Proceedings of the 37th International Symposium can be your answer since it can be read by an individual who have those short time problems.

Tony Paulson:

The book untitled Application of Computers and Operations Research in the Mineral Industry: Proceedings of the 37th International Symposium contain a lot of information on it. The writer explains her idea with easy technique. The language is very clear and understandable all the people, so do not worry, you can easy to read the idea. The book was authored by famous author. The author gives you in the new period of literary works. You can read this book because you can keep reading your smart phone, or device, so you can read the book throughout anywhere and anytime. If you want to buy the e-book, you can start their official website and order it. Have a nice examine.

Kenneth Sigler:

Don't be worry when you are afraid that this book may filled the space in your house, you might have it in e-book method, more simple and reachable. This particular Application of Computers and Operations Research in the Mineral Industry: Proceedings of the 37th International Symposium can give you a lot of pals because by you looking at this one book you have matter that they don't and make a person more like an interesting person. This book can be one of one step for you to get success. This guide offer you information that perhaps your friend doesn't learn, by knowing more than additional make you to be great persons. So , why hesitate? We should have Application of Computers and Operations Research in the Mineral Industry: Proceedings of the 37th International Symposium.
