Handbook of Mathematical Formulas and Integrals, Fourth Edition

Alan Jeffrey, Hui Hui Dai

Handbook of Mathematical Formulas and Integrals, Fourth Edition Alan Jeffrey, Hui Hui Dai

The extensive additions, and the inclusion of a new chapter, has made this classic work by Jeffrey, now joined by co-author Dr. H.H. Dai, an even more essential reference for researchers and students in applied mathematics, engineering, and physics. It provides quick access to important formulas, relationships between functions, and mathematical techniques that range from matrix theory and integrals of commonly occurring functions to vector calculus, ordinary and partial differential equations, special functions, Fourier series, orthogonal polynomials, and Laplace and Fourier transforms. During the preparation of this edition full advantage was taken of the recently updated seventh edition of Gradshteyn and Ryzhik's Table of Integrals, Series, and Products and other important reference works. Suggestions from users of the third edition of the Handbook have resulted in the expansion of many sections, and because of the relevance to boundary value problems for the Laplace equation in the plane, a new chapter on conformal mapping, has been added, complete with an atlas of useful mappings.

All disc-based content for this title is now available on the Web.

- Comprehensive coverage in reference form of the branches of mathematics used in science and engineering
- Organized to make results involving integrals and functions easy to locate
- Results illustrated by worked examples

All disc-based content for this title is now available on the Web.

From reader reviews:

Clarence Liller:

What do you in relation to book? It is not important to you? Or just adding material when you need something to explain what yours problem? How about your free time? Or are you busy man? If you don't have spare time to do others business, it is make you feel bored faster. And you have spare time? What did you do? All people has many questions above. The doctor has to answer that question due to the fact just their can do in which. It said that about publication. Book is familiar in each person. Yes, it is appropriate. Because start from on guardería until university need this kind of Handbook of Mathematical Formulas and Integrals, Fourth Edition to read.

Nancy Fisher:

Reading a publication can be one of a lot of exercise that everyone in the world likes. Do you like reading book therefore. There are a lot of reasons why people like it. First reading a book will give you a lot of new details. When you read a guide you will get new information since book is one of numerous ways to share the information or even their idea. Second, reading a book will make an individual more imaginative. When you studying a book especially tale fantasy book the author will bring that you imagine the story how the figures do it anything. Third, you can share your knowledge to other individuals. When you read this Handbook of Mathematical Formulas and Integrals, Fourth Edition, you can tells your family, friends and also soon about yours publication. Your knowledge can inspire different ones, make them reading a guide.

Jennifer Oaks:

Reading a e-book tends to be new life style in this particular era globalization. With looking at you can get a lot of information that will give you benefit in your life. Having book everyone in this world could share their idea. Guides can also inspire a lot of people. Lots of author can inspire their very own reader with their story or perhaps their experience. Not only the storyplot that share in the guides. But also they write about the ability about something that you need example. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that exist now. The authors these days always try to improve their skill in writing, they also doing some study before they write on their book. One of them is this Handbook of Mathematical Formulas and Integrals, Fourth Edition.

Dennis Stclair:

In this period globalization it is important to someone to obtain information. The information will make you to definitely understand the condition of the world. The condition of the world makes the information quicker to share. You can find a lot of referrals to get information example: internet, paper, book, and soon. You can see that now, a lot of publisher which print many kinds of book. Typically the book that recommended to you personally is Handbook of Mathematical Formulas and Integrals, Fourth Edition this e-book consist a lot of the information with the condition of this world now. This specific book was

represented just how can the world has grown up. The dialect styles that writer use to explain it is easy to understand. The particular writer made some analysis when he makes this book. Here is why this book ideal all of you.
