**Artificial Intelligence in Geography** Stan Openshaw, Christine Openshaw

This unique work introduces the basic principles of artificial intelligence with applications in geographical teaching and research, GIS, and planning. Written in an accessible, non-technical and witty style, this book marks the beginning of the AI revolution in geography with major implications for teaching and research. The authors provide an easy to understand basic introduction to AI relevant to geography. There are no special mathematical and statistical skills needed, indeed these might well be a hindrance. AI is a different way of looking at the world and it requires a willingness to experiment, and readers who are unhindered by the baggage of obsolete technologies and outmoded philosophies of science will probably do best. The text provides an introduction to expert systems, neural nets, genetic algorithms, smart systems and artificial life and shows how they are likely to transform geographical enquiry.

- \* A major methodological milestone in geography
- \* The first geographical book on artificial intelligence (AI)
- \* No need for previous mathematical or statistical skills/knowledge
- \* Accessible style makes a difficult subject available to a wide audience
- \* Stan Openshaw is one of the world's leading researchers into geographical computing, spatial analysis and GIS.

### **From reader reviews:**

#### **David Black:**

The book Artificial Intelligence in Geography can give more knowledge and also the precise product information about everything you want. So why must we leave the best thing like a book Artificial Intelligence in Geography? Several of you have a different opinion about guide. But one aim in which book can give many data for us. It is absolutely appropriate. Right now, try to closer with the book. Knowledge or info that you take for that, you could give for each other; you can share all of these. Book Artificial Intelligence in Geography has simple shape but the truth is know: it has great and massive function for you. You can search the enormous world by open and read a guide. So it is very wonderful.

#### **Harley Campbell:**

What do you with regards to book? It is not important to you? Or just adding material when you require something to explain what the ones you have problem? How about your time? Or are you busy individual? If you don't have spare time to do others business, it is give you a sense of feeling bored faster. And you have free time? What did you do? All people has many questions above. They should answer that question since just their can do that will. It said that about e-book. Book is familiar on every person. Yes, it is proper. Because start from on pre-school until university need this Artificial Intelligence in Geography to read.

#### **Manuel Arndt:**

Often the book Artificial Intelligence in Geography will bring one to the new experience of reading a book. The author style to describe the idea is very unique. When you try to find new book to see, this book very appropriate to you. The book Artificial Intelligence in Geography is much recommended to you to study. You can also get the e-book from official web site, so you can more easily to read the book.

#### **George Hyler:**

Why? Because this Artificial Intelligence in Geography is an unordinary book that the inside of the publication waiting for you to snap the idea but latter it will distress you with the secret this inside. Reading this book next to it was fantastic author who else write the book in such wonderful way makes the content within easier to understand, entertaining approach but still convey the meaning totally. So , it is good for you because of not hesitating having this anymore or you going to regret it. This book will give you a lot of advantages than the other book get such as help improving your ability and your critical thinking method. So , still want to delay having that book? If I ended up you I will go to the book store hurriedly.
