## **Frege Explained (Ideas Explained)** Joan Weiner

What is the number one? How can we be sure that  $2+2=4$ ? These apparently simple questions have perplexed philosophers for thousands of years, but discussion of them was transformed by the German philosopher Gottlob Frege (1848-1925).

Frege (pronounced Fray-guh) believed that arithmetic and all mathematics are derived from logic, and to prove this he developed a completely new approach to logic and numbers. Joan Weiner presents a very clear outline of Frege's life and ideas, showing how his thinking evolved through successive books and articles.
